

DESPITE LOBBIES FIGHTING AGAINST, SUSTAINABLE PERSONAL MOBILITY IS NOW A REALITY

Intelligent charging points in the heart of Madrid

Drafting

A few meters from the Atocha station, the Hotel Husa Paseo del Arte, has gathered this week, the most representative of the electric vehicle industry, to celebrate the commissioning of two new intelligent recharging points.

A friendly and warm event hosted by journalist, TV presenter Zero Emissions, Ricardo Fraguas Poole, enthusiastic communicator of the benefits on the rational use of energy program.

Marta Gaspart, godmother of the initiative group for the promotion Husa the use of electric vehicles, appreciated the presence of the audience and the sample of clean vehicles, checked the good functioning of the new intelligent recharging points and was encouraged to experience the sensations of the super sports car 100% electric Tesla Roadster, the Scottish entrepreneur who lives in Spain, Mark Gemell. "Thank you Mark. I loved it, very nice, very soft, clean, fast and quiet. It is a wonder. "

Pablo Fernandez de la Torre, Chief Executive Officer of N2S, the leading company in innovative solutions for intelligent energy management, owned by the Spanish group Gamesa, said to be very pleased with the hotel group HUSA contribution to the promotion of sustainable mobility and he expressed his conviction that electric mobility and intelligent energy management are engines of sustainable development is booming. Despite the situation of generalized depression in most production processes.

N2S has designed and installed intelligent recharging points Hotel Husa Paseo del Arte, operating from this week.

"N2S, as business development and technological innovation, has always believed in sustainable mobility support all public and private initiatives aimed at its promotion and implementation, as was the National Strategic Plan of electric vehicles, and are the wills of many companies the sector with which we work. " "Despite the crisis, despite the lobbies fighting against, sustainable mobility is a reality." "It's good for people and for the cities, noise and air pollution, efficiency." Fernandez de Tower expressed the need for continued public-private partnership to strengthen the ecosystem of energy efficiency and sustainable mobility. He shared indicators for optimism as are, for the first time in France, sales of electric vehicles exceeded leaders combustion engine, referring to the new commitment of Renault electric vehicles, with marketing five seats ZOE. Of imminent release, also in our country. Tesla Motors, manufacturer chosen as Car of the Year 2013 in the United States, ended the quarter quadrupling the estimated benefits. The European Union has set very specific goals, covered with funds for emissions reduction based on improved energy efficiency and sustainable mobility. "These are very significant events that show us that this is coming." He concludes the head of N2S.

Jose Alberto Garcia, Director of the Hotel Husa Paseo del Arte Husa recalled the history of the group that was born in 1929 and since then has not stopped innovating continuing with the original premise of personalized customer service from their hotels. "The Hotel Husa Paseo del Arte is your house. We also share the concern with N2S for energy efficiency with whom we work for years, and now in wireless communications in e-mobility ".

A celebration Comarth commercial director Candido Amoros joined to announce the launch of the new 100% electric light quadricycle of Spanish manufacturing, now for four occupants.

The ceremony was also attended by representatives of the administration in the people of the Director of the Energy Agency of the City of Madrid and Director of Electric Vehicle Industry Ministry.

All attendees enjoyed a wide representation of the best electric car industry. The Tesla Roadster, until the arrival of his older brother still the fastest (from 0 to 100km / h in less than 4 sec) and greater autonomy (400 km). Also present was silently "Obama car" Chevrolet Volt General Motors, 100% electric with its autonomy extender allows for long road journeys. Mitsubishi, a pioneer in the marketing of 100% electric cars, brought his four-seater minivan i MiEV. Renault its wide range of vehicles 100% was presented with the giant zero emissions Renault Kangoo Maxi ZE (5 places plus a large cargo space). There were also new Comarth, two-wheeled electric vehicles, the maxi scooter LEMev Spanish, the cooltra and Oset.
